Both Armies Along 300 Mile Front Have Received and Placed Re-inforcements and Will Join Soon In Trenchous Struggle.

(Associated Press). LONDON, Oct. 15.—Two great battles, one in Northern France and the other in Russian Poland, both with three hundred miles front, were being waged today.

The public is allowed only an occasional glimpse of the fighting through official communications, which are extremely sparse. But from the French report it appears the western front is being slowly and steadily worked over by the enemy.

The Germans, who started the advance on Calais and other French coast ports have been forced to evacuate the left bank of the Loire. Paris has fallen into the hands of the Allies.

In the Russian sector also, the Allies have advanced, particularly toward Russian Poland. Two German trenches near the border of the Russian Polish line have been reported captured. This shows a determined and properly coordinated attempt to drive the Germans away from Vilna, which was under heavy bombardment from the Polish front.

The French advance in this vicinity also indicates the attempt to break through the German front and force a wedge between the German and Russian fronts.

On the French right, where quiet has prevailed recently, the Germans continued the advance on the north of the Rhine near Cologne. The British military critics view the situation as a "most cheerless one." The Germans have occupied Burgundy and probably now are on the Rhine. The Allied forces, however, are believed to have penetrated toward the Rhine in several places.

There are rumors that there have been some advances and retreats but that no decisive action has been taken as yet.

A Russian official report states there are no changes in the battle situation in Poland.

AWAKENING FOR REICES BERNSTEIN REPORTS MOVING AMERICAN PARADE

BATTLE FIGHTED (For Two) Oct. 15.—It appears evident that considerable work has been done in the American battle lines, but no decisive gains have been made as yet.

The American advance has been slow and steady, but the Allies are slowly gaining ground.

The Allied commander expects the German forces to give in another powerful effort in the west.

This is expected to continue in line with the Allied policy.

MORE MONEY FOR TURKEY ON SKILL DEMOBILIZE ARMY.

The Turkish government has been more fighting South of Damascus in Syria, which disposes with the report that the Russian advance had been stopped and two thirds of the report that Faisal had been captured.

Armenia has suffered another blow in its war to be a large battle and to national defense against as well against the influence of German and Turkish influence.

KNOCKED OFF MOTORCYCLE HE MOUNTED CAR WHICH HIT HIM AND GOT ONLY SLIGHT BRAWSE.

Yesterday evening at the corner of 13th and Peachtree Street, the motorcycle which knocked a man off the curb was hit by a street car, and the man was knocked unconscious.

The street car was en route to the front of the curb and was being driven by a man who appeared to be drunk. The man was taken to the hospital and is expected to recover.

On the west side of Peachtree Street there was another accident in which a man was knocked off the curb.

ELITE THEATER CHANGES HANDS.

The Elite theater on Church street in Atlanta has been sold and will be occupied by a new management. The old management consisted of Mr. and Mrs. Coonan and Mrs. and Mrs. Stoddard.

Wednesday afternoon of service on the S.S. "Chatham" out of New York City to the east coast of England. The ship left the dock at 5 p.m. Tuesday.

The ship was practically full. It was expected to arrive at its destination in about two days.

The ship was powered by engines and was steered by a single engineer.

SCALE GAS RATES FOR ATHENS APPROVED BY R. C. COMMISSION.

The scale gas rates for Athens were approved by the R. C. Commission at a meeting held last week.

The rates are as follows: $1.50 per thousand cubic feet for the first 10,000 cubic feet, $1.25 per thousand cubic feet for the second 10,000 cubic feet, and $1.00 per thousand cubic feet for all gas used above 20,000 cubic feet.
